JOURNAL

OF

BACTERIOLOGY

VOLUME 66

BALTIMORE, MD.
1953

CONTENTS

No. 1, July 1953

Relation Between Changes in the Stability of *Pasteurella tularensis* Suspensions and in its Bacterial Population. I. The Stability of Suspensions of *Pasteurella tularensis* in the Presence of Electrolytes. Y. Avi-dor and H. Yaniv 1

Relation Between Changes in the Stability of *Pasteurella tularensis* Suspensions and in its Bacterial Population. II. Mutual Influence between Salt-Agglutinable and Salt-Nonagglutinable Types. H. Yaniv and Y. Avi-dor 6

A Glucose-6-Phosphate Dehydrogenase in *Leuconostoc mesenteroides*. R. D. DeMoss, C. Gunsalus, and R. C. Bard 10

The Metabolism of Species of Streptomyces. VII. The Hexosemonophosphate Shunt and Associated Reactions. Vincent W. Cochrane, Harry D. Peck, Jr., and Anne Harrison 17

The Taxonomic Significance of Fermentative versus Oxidative Metabolism of Carbohydrates by Various Gram Negative Bacteria. Rudolph Hugh and Einar Leifson 24

Some Nutritional Requirements for Biosynthesis of Riboflavin by *Eremothecium ashbyii*. Richard J. Hickey 27

Infection of Mice with Single Spores of *Histoplasma capsulatum*. Libero Ajello and Lalliah C. Runyon 34

Rapidly Growing, Acid Fast Bacteria. I. Species' Descriptions of *Mycobacterium phlei* Lehmann and Neumann and *Mycobacterium smegmatis* (Trevisan) Lehmann and Neumann. Ruth E. Gordon and Mildred M. Smith 41

Increased Pantothenate-synthesizing Enzyme in Streptomycin-resistant *Escherichia coli*. Orville Wyss and George E. Schaiberger 49

Mutant Yeast Strains Resistant to Arsenate and Azide. M. Sussman and S. G. Bradley 52

A Paradoxical Effect of Penicillin. Robert F. Parker 60

Interconversion of Isocitrate and Alpha-ketoglutarate by *Escherichia freundii*. Stanley Barban and Sam Ajl 68

Effect of Excess Amino Acids on Growth of Certain Lactobacilli. Arthur E. Terri and Dorothy Josselyn 72

The Action of Streptomycin. VI. A New Metabolic Intermediate. W. W. Umbreit 74

The Role of Iron in the Biology of *Brucella suis*. I. Growth and Virulence. William S. Waring, Sanford S. Elberg, Patricia Schneider, and William Green 82

Some Factors Influencing the Laboratory Mass Cultivation of *Shigella sonnei*. Richard B. Johnson 92

Appearance of Sulfhydryl Groups During Growth of *Bacillus globigii*. L. E. Mortenson and H. Beinert 101

Experimental Studies on the Pathogenesis of Encephalomyocarditis Virus for Mice. I. The Factor of Sex of Animal as Affecting Pathogenicity of Inoculum and Susceptibility to Infection. George H. Scherr 105

The Action of Lysozyme on the Cell Wall and Capsule of *Bacillus megaterium*. H. J. Welshimer 112

Notes:

Salmonella alachua, a New Serotype. Willa Dean Lowery, William V. Smith, Mildred M. Galton, and P. R. Edwards 118

Thiazolidone Antibiotic as an Antimetabolite to Biotin. Hammao Umezawa, Kiyoshi Oikawa, Yoshiro Okami, and Kenji Maeda 118

Serratia marcescens Bacteriophages. Michael M. Wassermann and Erich Seligmann 119

The Utilization of Sucrose by *Pseudomonas putrefaciens*. Harold P. Klein 120

No. 2, August 1953

Number and Characteristics of Lactate Utilizing Organisms in the Rumen of Cattle. Jose Gutierrez 123

Aromatic Biosynthesis. VII. Accumulation of Two Derivatives of Shikimic Acid by Bacterial Mutants. Bernard D. Davis and Elizabeth S. Mingioli 129

Observations on the Staining of *Bacillus megaterium* with Triphenyltetrazolium. Claes Weibull 137
Studies on Antibiotic Resistance and the Nucleic Acid Content of Bacteria. Joseph Smolens and Agnes B. Vogt 140
Synthesis of Glutamic Acid and Alanine by *Salmonella pullorum*. A. Warren Jones, Jr. and D. Frank Holtman 147
Studies on Antibiotic Synergism and Antagonism: The Effect *in vitro* of Combinations of Antibiotics on Bacteria of Varying Resistance to Single Antibiotics. J. B. Gunnison, M. C. Shevky, J. A. Bruff, V. R. Coleman, and E. Jawetz 150
Agglutination by Human Sera of Erythrocytes Incubated with Streptococcal Culture Concentrates. T. N. Harris and Susanna Harris 159
Antigenic Relationships of *Haemophilus pertussis*, the Parapertussis Bacillus, and *Brucella bronchiseptica* as Shown by Cross Protection Tests in Mice. Pearl L. Kendrick, Esther B. Nadolski, Grace Eldering, and Julia Baker 166
The Oxidation of Glucose by *Penicillium chrysogenum*. C. W. DeFiebre and S. G. Knight 170
Ultrafiltration of Recently Isolated Neurotropic Viruses. K. C. Smithburn and J. C. Bugher 173
A Study of the Application of Standard Phage Techniques to the Host-Phage System of *Corynebacterium diphtheriae*. Neal B. Groman and Royce Z. Lockart 178
Evidence for the Induced Nature of the Change from Nontoxigenicity to Toxigenicity in *Corynebacterium diphtheriae* as a Result of Exposure to Specific Bacteriophage. Neal B. Groman 184
Amide Synthesis and Transamidation During Growth of *Saccharomyces cerevisiae*. A. Leonard Sheffner and John Grabow 192
The Equivalence of Thiamin and Pyridoxine for a Strain of *Saccharomyces cerevisiae*. I. Effect on Growth Rate and Carboxylase Activity. William Moses and M. A. Joslyn 197
The Equivalence of Thiamin and Pyridoxine for a Strain of *Saccharomyces cerevisiae*. II. The Loss of Pyridoxine During Growth and the Sparing Effect of Thiamin Transaminase Activity. William Moses and M. A. Joslyn 204
Speciation within the Genus *Brucella*. II. Evaluation of Differential Dye, Biochemical, and Serological Tests. M. J. Pickett, E. L. Nelson, and J. D. Liberman 210
Transmittance of Tumor-Inducing Ability to Avirulent Crown-Gall and Related Bacteria. Deana T. Klein and Richard M. Klein 220
Infrequent Appearance of Drug Resistant Strains of Tubercle Bacilli in Experimental Animals Treated with Streptomycin and *p*-Amino-Salicylic Acid. Emanuel Wolinsky and William Steenken, Jr. 229
Notes:
The Relation Between Sulfonamide Resistance and *p*-Aminobenzoic Acid Requirement. Haim Yaniv and Bernard D. Davis 238
Reclamation of Streptococcal Cells for Reuse in Adsorption of Antisera. Elaine L. Updyke and Elizabeth Conroy 239
The Occurrence of "Cell Plates" in Bacteria. H. L. Chance 239
Selective Inhibition of Microbial Growth by the Incorporation of Triphenyl Tetrazolium Chloride in Culture Media. Eugene D. Weinberg 240
A Method of Obtaining Comparable Specimens for both Light and Electron Microscopy. R. G. E. Murray and Ralph W. G. Wyckoff 242
Failure to Demonstrate a Relationship between Tyrosine and the Toxicity of Diphtherial Culture Filtrates. Ruth N. Drew 244
The Initial Deviation from Linearity of the Thermal Death Rate Curve of a Putrefactive Anaerobe. Arthur M. Kaplan, Harold Lichtenstein, and Howard Reynolds 245

No. 3, SEPTEMBER 1953

Resistance to Lysis from without in Bacteria Infected with T2 Bacteriophage. N. Visconti 247
Studies on the Effect of Aeration on Nitrate Reduction by *Pseudomonas* Species Using

N^{15}. Richard O. Marshall, Henry J. Dishburger, Robert MacVicar, and Glenn D. Hallmark 254
Citric Acid Metabolism of *Aerobacter aerogenes*. S. Dagley and E. A. Dawes 259
Observations on Mycobacterial Esterases with a Series of Synthetic Substrates. Sidney Cohen, Judith B. Kushnick, and Carola V. Purdy 266
Some New Observations on L Forms of Bacteria. L. Dienes 274
Electron Micrographs Made from L Forms of *Proteus* and Two Human Strains of Pleuropneumonia-Like Organisms. L. Dienes 280
The Antigenic Composition of *Cryptococcus neoformans*. V. A Survey of Cross-reactions among Strains of *Cryptococcus* and Other Antigens. E. Edward Evans, Lloyd J. Sorensen, and Kenneth W. Walls 287
Studies on the Nutrition of *Brucella melitensis*. Troy H. Sanders, Kiyoshi Higuchi, and Carl R. Brewer 294
Spore Structure as Revealed by Thin Sections. C. F. Robinow 300
The Structure of Spores as Revealed by Mechanical Disruption. P. C. Fitz-James 312
Bacteriostatic, Bactericidal, and Drug Resistance Studies of Ethyl Gallate on *Mycobacterium tuberculosis*. Donald B. Johnstone and John E. Little 320
Factors Affecting the Formation of Acetylmethylcarbinol by *Lactobacillus arabinosus*. Albert G. Moat and Herman C. Lichstein 324
Influence of Glucose on the Growth Factor Requirement of a Mutant of *Escherichia coli*. H. Edwin Umbarger 328
Serological Relationships between Shigella and Coliform Cultures. W. H. Ewing 333
The Enzymatic Oxidation of *p*-Hydroxymandelic Acid to *p*-Hydroxybenzoic Acid. Shirley E. Gunter 341
The Co-killing of Penicillin Sensitive and Penicillin Resistant Bacteria at Low Concentrations of the Antibiotic. Arthur K. Saz and Harry Eagle 347
Amino Acid Requirements of the Maturation of Bacteriophage in Lysogenic *Escherichia coli*. Joseph S. Gots and George R. Hunt, Jr. 353
Electron Microscopy of Ultra-Thin Sections of Bacteria. I. Cellular Division in *Bacillus cereus*. George B. Chapman and James Hillier 362
Notes:
Methionine Sulfoxide and Specific Inhibition of Sporulation in *Bacillus subtilis*. Bernard J. Krask 374
Utilization of Nitrates by *Pseudomonas aeruginosa*. Pinghui Liu 375

No. 4, October 1953

Thermoactinomyces Tsiklinsky, a Genus of Thermophilic Actinomycetes. Selman A. Waksman and Charles T. Corke 377
The Bacteriophages of *Bacillus megaterium*. I. Serological, Physical, and Biological Properties. Murray Friedman and Philip B. Cowles 379
An Explanation for the Arithmetic Linear Growth of Mycobacteria. Wesley A. Volk and Quentin N. Myrvik 386
Relationship between "Chloramphenicol Reductase Activity" and Chloramphenicol Resistance in *Escherichia coli*. Joseph R. Merkel and Edward Steers 389
Studies on the Mechanism of the Loss of Chloramphenicol Resistance in *Escherichia coli*. Ernest C. Herrmann, Jr. and Edward Steers 397
The Mechanism of Catechol Oxidation by *Mycobacterium butyricum*. W. R. Sistrom and R. Y. Stainier 404
Auto-adaptation: A New Phenomenon Observed in a Bacterial Population. Barbara E. Wright 407
Effects of Some Salts on the Germicidal Action of High Voltage Cathode Rays Towards *Micrococcus pyogenes* var. *aureus*. Cecil G. Dunn 421
The Requirement of Electrolytes for the Adsorption of *Escherichia coli* Antigen by Red Blood Cells. Erwin Neter and N. Joyce Zalewski 424
The Origin of Phosphorus in the T1, T5, T6, and T7 Bacteriophages of *Escherichia coli*. Louis W. Labaw 429
The Production of Acid Phosphatase by Certain Species of *Actinomyces*. Arden Howell, Jr. and Robert J. Fitzgerald 437

The Significance of Lactose Fermentation and its Relationship to Resistance in *Klebsiella pneumoniae*. Victor J. Cabelli and M. J. Pickett 443
Blood Media for the Cultivation of *Mycobacterium tuberculosis*. VII. Comparison of Blood Agar-Penicillin and Lowenstein-Jensen Media under Routine Diagnostic Conditions. Maurice S. Tarshis, Patricia C. Kinsella, and Malcolm V. Parker 448
Staining Bacterial Polysaccharides. Ross E. McKinney 453
Reactivation of Ultraviolet Inactivated *Escherichia coli* by Pryuvate. F. Heinmets 455
Morphology of the Seven T-Bacteriophages. Robley C. Williams and Dean Fraser 458
Nitrogen Compounds Utilized by *Alcaligenes faecalis*. Leo J. Denault, Robert C. Cleverdon, and Walter L. Kulp 465
One Step Resistance Development to Isoniazid and Sodium-*p*-Aminosalicylate. Waclaw Szybalski and Vernon Bryson 468
Variation in Pigmentation and Morphology of Colonies of Gelatinous Strains of *Chromobacterium* species from Soil. William A. Corpe 470
Metabolic Reversal of Antibiotic Inhibition, Especially Reversal of Aureomycin Inhibition by Riboflavin. J. W. Foster and Robert F. Pittillo 478
Serological Relationship between the Meningococci of the French Type C and Group II *alpha*. Sara E. Branham and Marion F. Wormald 487
The Conversion of Negatives to Positives in "Slow" Adapting Populations of Yeast. B. Rotman and S. Spiegelman 492
The Appearance of Vesicular Nuclei in Some Microorganisms. J. B. Clark and R. B. Webb 498
Notes:
The Bacteriophages of *Bacillus megaterium*. II. Stability in Mono- and Divalent Ions. Murray Friedman 501
A Selective Medium for the Isolation of *Brucellae* from Contaminated Materials. C. D. Kuzdas and E. V. Morse 502

No. 5, November 1953

Studies on a New Oxalate-Decomposing Bacterium, *Pseudomonas oxalaticus*. S. R. Khambata and J. V. Bhat 505
Role of Calcium and Related Ions in Proliferation of Lactic Streptococcus Bacteriophage. Norman N. Potter and F. E. Nelson 508
Terminal Respiration in *Pseudomonas fluorescens*: Component Enzymes of the Tricarboxylic Acid Cycle. James T. Barrett and R. E. Kallio 517
Salt Desideratum of *Vibrio costicolus*, an Obligate Halophilic Bacterium. II. Effect of Salts on the Oxidation of Glucose. William L. Flannery, Raymond N. Doetsch, and P. Arne Hansen 526
The Growth Promoting and Antisulfonamide Activity of Pteroylglutamic Acid and Related Compounds for *Escherichia coli* and *Aerobacter aerogenes*. H. Francis Havas and Anne Peters McGeady 531
The Enzymatic Conversion of Mandelic Acid to Benzoic Acid. I. Gross Fractionation of the System into Soluble and Particulate Components. I. C. Gunsalus, C. F. Gunsalus, and R. Y. Stanier 538
The Enzymatic Conversion of Mandelic Acid to Benzoic Acid. II. Properties of the Particulate Fractions. R. Y. Stanier, I. C. Gunsalus, and C. F. Gunsalus 543
The Enzymatic Conversion of Mandelic Acid to Benzoic Acid. III. Fractionation and Properties of the Soluble Enzymes. C. F. Gunsalus, R. Y. Stanier, and I. C. Gunsalus 548
The Production of Chains by *Diplococcus pneumoniae* in Magnesium Deficient Media. Emeric J. Rochford and R. J. Mandle 554
The Nutritional Equivalence of Pantothenate and *p*-Aminobenzoate for the Growth of *Bacterium linens*. M. Purko, W. O. Nelson, and W. A. Wood 561
The Influence of Various Metabolites upon the *p*-Aminobenzoate-Pantothenate Interaction in *Bacterium linens*. M. E. Friedman, W. A. Wood, and W. O. Nelson 568
The Inactivation of Influenza Viruses by Tannic Acid and Related Compounds. Robert S. Carson and Arthur W. Frisch 572
Mode of Inactivation of Influenza Virus by Tannic Acid. Arthur W. Frisch and Robert S. Carson 576

Sources of Energy and the Dinitrophenol Effect in the Growth of *Acetobacter suboxydans*. Tsoo E. King and Vernon H. Cheldelin 581
Immunization against Brucella Infection. I. Isolation and Characterization of a Streptomycin-Dependent Mutant. Mendel Herzberg and Sanford Elberg 585
Immunization against Brucella Infection. II. Effectiveness of a Streptomycin-Dependent Strain of *Brucella melitensis*. Mendel Herzberg, Sanford S. Elberg, and Karl F. Meyer 600
The Oxidation of Glutamic Acid by *Brucella abortus*. A. G. Marr, C. B. Olsen, H. S. Unger, and J. B. Wilson 606
Metabolic Pathways of Glycerol Dissimilation. A Comparative Study of Two Strains of *Aerobacter aerogenes*. Boris Magasanik, Marcus S. Brooke, and Doris Karibian 611
Notes:
The Citric Acid Cycle and Bacterial Oxidation of Aromatic Acids. S. Dagley and A. Rodgers 620
The Fundamental Nature of Colicine Production. Joseph N. Nozaki, Mary Louise Robbins, and Leland W. Parr 621
Chick Embryo Extract, an Enrichment for Certain Strains of Pleuropneumonialike Organisms Isolated from Man. J. G. Lecce, W. R. Stinebring, and H. E. Morton 622
Mutants of the Azotobacter Unable to Use N_2. Margaret Green, Martin Alexander, and P. W. Wilson 623
Staling in Membrane Filter Cultures. Seymour Levine 624

No. 6, December 1953

The External Surface of the Human Body as a Habitat for Nonfermenting Nonpigmented Yeasts. G. H. Connell and C. E. Skinner 627
Utilization of Ethanol by Acetic Acid Bacteria. M. R. Raghavendra Rao and J. L. Stokes 634
The Effect of Stilbamidine and Propamidine on the Oxidative Metabolism of *Blastomyces dermatitidis*. Hilda Pope and Isabel Christison 639
Desoxyribonucleic Acid and the Budding Cycle in the Yeasts. Maurice Ogur, Sherwood Minckler, and Dan O. McClary 642
Selective Action of Thallium Acetate and Crystal Violet for Pleuropneumonia-like Organisms of Human Origin. Harry E. Morton and James G. Lecce 646
Some Properties of the Hexokinase of *Pseudomonas putrefaciens*. Harold P. Klein 650
The Amylases of *Pseudomonas saccharophila*. Philip S. Thayer 656
Glycogen of Enteric Bacteria. Seymour Levine, Heber J. R. Stevenson, Elbert C. Tabor, Robert H. Bordner, and Leslie A. Chambers 664
The Influence of Diphosphopyridine Nucleotide on the Stability of Typhus Rickettsiae. Marianna R. Bovarnick, Emma G. Allen, and Gloria Pagan 671
Acid Formation in Cultures of *Mycobacterium butyricum*. G. J. E. Hunter 676
Enzymatic Deadaptation. H. V. Rickenberg, Charles Yanofsky, and David M. Bonner 683
The Isolation of Protoplasts from *Bacillus megaterium* by Controlled Treatment with Lysozyme. Claes Weibull 688
Characterization of the Protoplasmic Constituents of *Bacillus megaterium*. Claes Weibull 696
The Metabolism of Ribonucleic Acid in Normal and Bacteriophage Infected *Escherichia coli*. Lionel A. Manson 703
Further Evidence for the Role of the Tricarboxylic Acid Cycle in Morphogenesis in *Blastocladiella emersonii*. Edward C. Cantino and Mildred T. Hyatt 712
The Differentiation of *Aerobacter aerogenes* and *Aerobacter cloacae*. Marcus S. Brooke 721
Notes:
Synthesis of Citrovorum Factor by *Leuconostoc citrovorum*: Potentiation by Ascorbic Acid. G. E. Foley and E. C. Haley 727
Index of Authors 729
Index of Subjects 733
Contents of Volume iii

INDEX OF SUBJECTS[1]

Acetamide, utilization of, by *Alcaligenes faecalis*, 465
Acetobacter melanogenum, utilization of ethanol by, 634
— *suboxydans*, sources of energy and dinitrophenol effect in growth of, 581
— —, utilization of ethanol by, 634
Acetylmethylcarbinol, factors affecting formation of, 324
Acid formation by *Mycobacterium butyricum*, 676
Actinomyces bovis, production of acid phosphatase by, 437
— *israeli*, production of acid phosphatase by, 437
— *naeslundi*, production of acid phosphatase by, 437
Adaptations in yeast, studies on, 492
Adsorption of antisera with streptococci, reclamation of cells for, 239
— — *Escherichia coli* by red blood cells, requirements of electrolytes for, 424
Aeration, effect of, on nitrate reduction, 254
Aerobacter aerogenes and *Aerobacter cloacae*, differentiation of, 721
— —, effect of pteroylglutamic acid on growth of, 531
— —, glycerol dissimilation by, 611
— —, glycogen of, 664
— —, metabolism of carbohydrates by, 24
— —, metabolism of citric acid by, 259
— *cloacae* and *Aerobacter aerogenes*, differentiation of, 721
Aeromonas liquefaciens, metabolism of carbohydrates by, 24
Agglutinability of suspensions of *Pasteurella tularensis*, factors governing, 1, 6
Agrobacterium tumefaciens, metabolism of carbohydrates by, 24
— —, transmittance of tumor-inducing ability of, 220
Alanine, synthesis of, by *Salmonella pullorum*, 147
Alcaligenes faecalis, metabolism of carbohydrates by, 24
— —, utilization of nitrogen compounds by, 465
Amide synthesis by *Saccharomyces cerevisiae*, 192
Amino acid requirements for maturtion of bacteriophage, 353
Amino acids, effect of excess on growth of lactobacilli, 72
— —, requirements of, for *Brucella melitensis*, 294
p-Aminobenzoic acid, requirement of, and resistance to sulfonamide, 238
— —, — — *Bacterium linens* for, 561, 568
Amylase of *Pseudomonas saccharophila*, 656
Antibiotic antagonism, 150
— inhibition, metabolite reversal of, 478
— resistance and the nucleic acid content of bacteria, 140
— synergism, 150
Antigens of *Brucella bronchiseptica*, 166
— — *Cryptococcus neoformans*, 287
— — *Haemophilus pertussis*, 166
— — parapertussis bacillus, 166
Arithmetic linear growth of mycobacteria, explanation for, 386
Aromatic acids, oxidation of, and the citric acid cycle, 620
— biosynthesis by bacterial mutants, 129
Arsenate, yeast strains resistant to, 52
Ascorbic acid, effect of, on synthesis of citrovorum factor by *Leuconostoc citrovorum*, 727
Asparagine, utilization of, by *Alcaligenes faecalis*, 465
Aspartic acid, utilization of, by *Alcaligenes faecalis*, 465
Aureomycin, inhibition of, by riboflavin, 478
Auto-adaptation, a new phenomenon observed in a bacterial population, 407
Azide, yeast strains resistant to, 52
Azotobacter agile, mutants of, unable to use N_2, 623
— *vinelandii*, mutants of, unable to use N_2, 623

Bacillus cereus, electron micrographs of ultra-thin sections of, 362
— —, structure of spores of, 300, 312
— *globigii*, appearance of sulfhydryl groups during growth of, 101
— *megaterium*, action of lysozyme on cell wall and capsule of, 112
— —, bacteriophages of, 379, 501
— —, isolation of protoplasts from, 688, 696
— —, resistance of, to isonicotinylhydrazine, 468
— —, staining of, with triphenyltetrazolium, 137
— —, structure of spores of, 300, 312
— *subtilis*, inhibition of sporulation in, by methionine sulfoxide, 374
Bacteriophage, amino acid requirements for maturation of, 353
— for *Corynebacterium diphtheriae*, 178, 184
— infected *Escherichia coli*, metabolism of ribonucleic acid in, 703
—, lactic streptococcus, role of calcium in proliferation of, 508
—, T2, resistance to lysis from, 247
Bacteriophages for *Serratia marcescens*, 119
—, morphology of the seven T, 458
— of *Bacillus megaterium*, 379, 501

[1] All entries indexed to first page of article.

Bacteriophages of *Escherichia coli*, origin of phosphorus in, 429
Bacterium anitratum, metabolism of carbohydrates by, 24
— *linens*, nutrition of, 561, 568
Benzoylformic carboxylase of *Pseudomonas fluorescens*, properties of, 538, 543, 548
Biotin, thiazolidone antibiotics as an antimetabolite to, 118
Blastocladiella emersonii, role of the tricarboxylic acid cycle in morphogenesis in, 712
Blastomyces dermatitidis, antigens of, 287
— —, effect of stilbamidine and propamidine on metabolism of, 639
Blood media for cultivation of *Mycobacterium tuberculosis*, 448
Brucella bronchiseptica, antigens of, 166
Brucella infection, immunization against, 585, 600
Brucella melitensis, nutrition of, 294
— —, use of a streptomycin-dependent strain of, for immunization, 585, 600
— species, selective medium for isolation of, 502
— *suis*, role of iron in biology of, 82
Budding cycle in yeasts, desoxyribonucleic acid and, 642

Cadaverine, utilization of, by *Alcaligenes faecalis*, 465
Calcium, role of, in proliferation of lactic streptococcus bacteriophage, 508
Candida lipolytica, isolation of, from human body, 627
— *mesenterica*, isolation of, from human body, 627
— *zeylanoides*, isolation of, from human body, 627
Capsule, action of lysozyme on, of *Bacillus megaterium*, 112
Carboxylase in *Saccharomyces cerevisiae*, effect of thiamin and pyridoxine on, 197, 204
Catechol oxidation by *Mycobacterium butyricum*, mechanism of, 404
Cathode rays, effect of salts on germicidal action of, 421
Cattle, lactate utilizing organisms in rumen of, 123
Cell plates in bacteria, occurrence of, 239
— wall, action of lysozyme on, of *Bacillus megaterium*, 112
Cellular division in *Bacillus cereus*, 362
Chick embryo extract, an enrichment for pleuropneumonialike organisms, 622
Chloramphenicol reductase activity and chloramphenicol resistance, relationship between, in *Escherichia coli*, 389
— resistance in *Escherichia coli*, 389, 397
Chromobacterium species, variation in pigmentation of, 470
Citric acid cycle and bacterial oxidation of aromatic acids, 620
— —, metabolism of, by *Aerobacter aerogenes*, 259
Citrovorum factor, synthesis of, by *Leuconostoc citrovorum*, 727
Coccidioides immitis, antigens of, 287
Colicine production, nature of, 621
Coliform bacteria, serological relationships between shigellae and, 333
Corynebacterium diphtheriae, bacteriophage for, 178, 184
— —, toxigenicity of, role of bacteriophage in, 184
Crown-gall bacteria, transmittance of tumor-inducing ability of, 220
Cryptococcus aerius, isolation of, from human body, 627
— *albidus*, isolation of, from human body, 627
— *diffluens*, isolation of, from human body, 627
— *laurentii*, isolation of, from human body, 627
— *luteolus*, isolation of, from human body, 627
— *minor*, isolation of, from human body, 627
— *neoformans*, antigens of, 287
— *rotundatus*, isolation of, from human body, 627
Crystal violet, selective action of, for pleuropneumonialike organisms, 646
Cystine, utilization of, by *Alcaligenes faecalis*, 465

Death rate curve of a putrefactive anaerobe, deviation from linearity of, 245
Dehydrogenase, glucose-6-phosphate, in *Leuconostoc mesenteroides*, 10
Desoxyribonucleic acid and the budding cycle in yeasts, 642
Digallic acids, inactivation of influenza virus by, 572
Diphosphopyridine nucleotide, effect of, on stability of typhus rickettsiae, 671
Diphtherial filtrates, tyrosine and toxicity of, 244
Diplococcus pneumoniae, effect of magnesium on production of chains by, 554
— —, — — penicillin on, 347
Drug resistant strains of tubercle bacilli, infrequent appearance of, 229
Dyes, effect of, on stability of suspensions of *Pasteurella tularensis*, 1

Electrolytes, effect of, on stability of suspensions of *Pasteurella tularensis*, 1, 6
Electron micrographs of L forms of *Proteus*, 280
— — — pleuro-pneumonia-like organisms, 280
— — — seven T-bacteriophages, 458
— — — ultra-thin sections of bacteria, 362
Electron microscopy, method for obtaining specimens for, 242
Encephalomyocarditis virus, pathogenesis of for mice, 105
Enteric bacteria, glycogen of, 664
Enzymatic deadaptation, 683
Eremothecium ashbyii, nutrition of, 27
— —, synthesis of riboflavin by, 27

Escherichia coli, adsorption of, by red blood cells, requirements of electrolytes for, 424
— —, aromatic auxotrophs of, accumulation of derivatives of shikimic acid in, 129
— —, effect of pteroylglutamic acid on growth of, 531
— —, β-galactosidase activity of, 683
— —, glycogen of, 664
— —, influence of glucose on growth factor requirements of, 328
— —, metabolism of carbohydrates by, 24
— —, — — ribonucleic acid in bacteriophage infected, 703
— —, origin of phosphorus in bacteriophages of, 429
— —, pantothenate-synthesizing enzyme in, 49
— —, relationship between chloramphenicol reductase activity and chloramphenicol resistance in, 389
— *freundii*, interconversion of isocitrate and α-ketoglutarate by, 68
Esterases in mycobacteria, 266
Ethanol, utilization of, by acetic acid bacteria, 634
Ethyl gallate, resistance of *Mycobacterium tuberculosis* to, 320

Fermentative versus oxidative metabolism in bacteria, 24
Fluoride, yeast strains resistant to, 52
Formic hydrogenlyase, activity of, in *Aerobacter aerogenes*, 259

Gaffkya tetragena, vesicular nuclei in, 498
β-Galactosidase activity of *Escherichia coli*, 683
Glucose, influence of, on growth factor requirements of *Escherichia coli*, 328
—, metabolism of by *Streptomyces* species, 17
—, oxidation of, by *Penicillium chrysogenum*, 170
Glucose-6-phosphate dehydrogenase in *Leuconostoc mesenteroides*, 10
Glutamic acid, synthesis of, by *Salmonella pullorum*, 147
Glutamine, utilization of, by *Alcaligenes faecalis*, 465
Glutathione, utilization of, by *Alcaligenes faecalis*, 465
Glycerol dissimilation, metabolic pathways of, by *Aerobacter aerogenes*, 611
—, formation of acid from, by *Mycobacterium butyricum*, 676
Glycogen of enteric bacteria, 664
Growth factor requirements of a mutant of *Escherichia coli*, 328

Haemophilus pertussis, antigens of, 166
— —, resistance of, to streptomycin, 140
— —, — —, — terramycin, 140
Hexokinase of *Pseudomonas putrefaciens*, 650
Hexosemonophosphate shunt in *Streptomyces* species, 17
Histidine, utilization of, by *Alcaligenes faecalis*, 465
Histoplasma capsulatum, antigens of, 287
— —, infection of mice with spores of, 34
Human skin as a habitat for yeasts, 627
p-Hydroxymandelic acid, enzymatic oxidation of, to *p*-hydroxybenzoic acid, 341

Influenza virus, inactivation of, by digallic acids, 572
— —, — —, — tannic acid, 572, 576
Iodoacetate, yeast strains resistant to, 52
Iron, requirements of, for *Brucella melitensis*, 294
—, role of, in biology of *Brucella suis*, 82
Isocitrate and α-ketoglutarate, interconversion of, by *Escherichia freundii*, 68
Isoniazid, resistance of *Bacillus megaterium* to, 468
Isonicotinylhydrazine, resistance of *Bacillus megaterium* to, 468

α-Ketoglutarate and isocitrate, interconversion of, by *Escherichia freundii*, 68
Klebsiella pneumoniae, lactose fermentation and its relationship to resistance in, 443

L forms of bacteria, observations on, 274
Lactate utilizing organisms in rumen of cattle, 123
Lactic streptococcus bacteriophage, role of calcium in proliferation of, 508
Lactobacillus arabinosus, effect of excess amino acids on growth of, 72
— —, factors affecting formation of acetylmethylcarbinol by, 324
— *casei*, effect of excess amino acids on growth of, 72
— *fermenti*, effect of excess amino acids on growth of, 72
— *leichmannii*, effect of excess amino acids on growth of, 72
Lactose fermentation and its relationship to resistance in *Klebsiella pneumoniae*, 443
Leuconostoc citrovorum, synthesis of citrovorum factor by, 727
— *mesenteroides*, glucose-6-phosphate dehydrogenase in, 10
Light microscopy, method for obtaining specimens for, 242
Lipomyces starkeyi, isolation of, from human body, 627
Lysis from without in bacteria infected with T2 bacteriophage, 247
Lysozyme, action of, on cell wall and capsule of *Bacillus megaterium*, 112

Magnesium, effect of, on production of chains by *Diplococcus pneumoniae*, 554
—, requirements of, for *Brucella melitensis*, 294
Malleomyces pseudomallei, metabolism of carbohydrates by, 24
Mandelic acid dehydrogenase of *Pseudomonas fluorescens*, properties of, 538, 543, 548
— —, enzymatic conversion of, to benzoic acid, 538, 543, 548
— — racemase of *Pseudomonas fluorescens*, properties of, 538, 543, 548
Manganese, requirements of, for *Brucella melitensis*, 294
Medium, selective for isolation of *Brucella* species, 502
Membrane filter cultures, staling in, 624
Meningococci, serological relationship between, 478
Methionine sulfoxide, inhibition of sporulation in *Bacillus subtilis* by, 374
Mice, infection of, with spores of *Histoplasma capsulatum*, 34
Micrococcus pyogenes var *aureus*, effect of penicillin on, 347
— — — —, — — salts on germicidal action of cathode rays for, 421
— — — —, resistance of, to streptomycin, 140
— — — —, vesicular nuclei in, 498
Micromonospora chalcea, characteristics of, 377
—, characterization of the genus, 377
Morphogenesis in *Blastocladiella emersonii*, role of the tricarboxylic acid cycle in, 712
Morphology of seven T-bacteriophages, 458
Mutants of azotobacter unable to use N_2, 623
Mycobacteria, explanation for arithmetic linear growth of, 386
Mycobacterium berolinense, taxonomy of, 41
— *butyricum*, acid formation by, 676
— —, esterases in, 266
— —, mechanism of catechol oxidation by, 404
— —, taxonomy of, 41
— *friburgensis*, taxonomy of, 41
— *friedmannii*, taxonomy of, 41
— *graminis*, taxonomy of, 41
— *lacticola*, esterases in, 266
— —, taxonomy of, 41
— *phlei*, esterases in, 266
— —, species description of, 41
— *smegmatis*, esterases in, 266
— —, species description of, 41
— *stercoris*, taxonomy of, 41
— *tuberculosis*, blood media for cultivation of, 448
— —, esterases in, 266
— —, infrequent appearance of drug resistant strains of, 229
— —, resistance of, to ethyl gallate, 320
Neurotropic viruses, ultrafiltration of, 173
Nitrate reduction, effect of aeration on, 254
—, utilization of, by *Pseudomonas aeruginosa*, 375
Nitrogen compounds utilized by *Alcaligenes faecalis*, 465
Nocardia corallina, vesicular nuclei in, 498
Nuclei, vesicular, in microorganisms, 498
Nucleic acid content of bacteria, 140
Nutrition of a mutant of *Escherichia coli*, 328
— — *Bacterium linens*, 561, 568
— — *Brucella melitensis*, 294
— — *Eremothecium ashbyii*, 27
— — lactobacilli, 72
— — *Shigella sonnei*, 92

Oxalate, decomposition of, by *Pseudomonas oxalaticus*, 505
Oxidative versus fermentative metabolism in bacteria, 24

Pantothenate-synthesizing enzyme in streptomycin-resistant *Escherichia coli*, 49
Pantothenic acid, requirements of *Bacterium linens* for, 561, 568
Parapertussis bacillus, antigens of, 166
Pasteurella tularensis, agglutinability of, factors governing, 1, 6
— —, changes in stability of suspensions of, 1, 6
Pathogenesis of encephalomyocarditis virus for mice, 105
Penicillin, factors governing action of, 60
—, killing of bacteria by low concentrations of, 347
—, paradoxical effect of, 60
Penicillium chrysogenum, oxidation of glucose by, 170
Phosphatase, production of acid, by actinomyces, 437
2-Phospho-4-hydroxy-4-carboxy-adipic acid, a new metabolic intermediate, 74
Phosphorus, origin of, in bacteriophages of *Escherichia coli*, 429
Pigmentation of *Chromobacterium* species, variation in, 470
Pleuropneumonialike organisms, chick embryo extract, an enrichment for, 622
— —, selective action of thallium acetate and crystal violet for, 646
Polysaccharides, staining bacterial, 453
Population, auto-adaptation observed in a bacterial, 407
Propamidine, effect of, on metabolism of *Blastomyces dermatitidis*, 639
Propionibacterium acnes, organisms resembling, in rumen of cattle, 123
Protoplasts, isolation of, from *Bacillus megaterium*, 688, 696

Pseudomonas aeruginosa, metabolism of carbohydrates by, 24
— —, oxidation of *p*-hydroxymandelic acid by, 341
— —, utilization of nitrate by, 375
— *denitrificans*, nitrate reduction by, 254
Pseudomonas fluorescens, benzoylformic carboxylase of, 538, 543, 548
— —, component enzymes of the tricarboxylic acid cycle in, 517
— —, mandelic acid dehydrogenase of, 538, 543, 548
— —, — — racemase of, 538, 543, 548
— —, nitrate reduction by, 254
— —, oxidation of mandelic acid to benzoic acid by, 538, 543, 548
— —, terminal respiration in, 517
— *oxalaticus* n. sp., decomposition of oxalate by, 505
— *putrefaciens*, hexokinase of, 650
— —, utilization of sucrose by, 120
— *saccharophila*, amylase of, 656
Pteroylglutamic acid, effect of, on growth of *Escherichia coli* and *Aerobacter aerogenes*, 531
Putrefactive anaerobe, deviation from linearity of death rate curve of, 245
Putrescine, utilization of, by *Alcaligenes faecalis*, 465
Pyridoxine, relationship of, to thiamin in growth of *Saccharomyces cerevisiae*, 197, 204
Pyruvate, conversion of, to acetylmethylcarbinol, 324
—, reactivation of ultraviolet inactivated *Escherichia coli* by, 455

Reactivation of ultraviolet inactivated *Escherichia coli* by pyruvate, 455
Red blood cells, adsorption of *Escherichia coli* by, requirements of electrolytes for, 424
Riboflavin, inhibition of aureomycin by, 478
—, synthesis of, by *Eremothecium ashbyii*, 27
Ribonucleic acid, metabolism of, by bacteriophage infected *Escherichia coli*, 703
Rickettsiae, effect of diphosphopyridine nucleotide on stability of typhus, 671
Rumen of cattle, lactate utilizing organisms in, 123

Saccharomyces cerevisiae, amide synthesis by, 192
— —, relationship of thiamin to pyridoxine in growth of, 197, 204
— —, strains of, resistant to arsenate and azide, 52
Salmonella alachua, a new serotype, 118
— *montevideo*, glycogen of, 664
— *pullorum*, synthesis of alanine by, 147
— —, — — glutamic acid by, 147
Salts, effect of, on oxidation of glucose by *Vibrio costicolus*, 526
—, — —, — stability of suspensions of *Pasteurella tularensis*, 1, 6
Serological relationship between meningococci, 478
— relationships between shigellae and coliform cultures, 333
Serratia marcescens bacteriophages, 119
17 system, a new bacterial host-virus system, 379
Shigella cultures, serological relationships between coliform bacteria and, 333
— *dysenteriae*, metabolism of carbohydrates by, 24
— *sonnei*, mass cultivation of, 92
— —, nutrition of, 92
Shikimic acid, accumulation of derivatives of in bacteria, 129
Skin, human, as a habitat for yeasts, 627
Spores, structure of, as revealed by mechanical disruption, 312
—, — —, — — — thin sections, 300
Sporulation in *Bacillus subtilis*, inhibition of, by methionine sulfoxide, 374
Staining bacterial polysaccharides, 453
— of *Bacillus megaterium* with triphenyltetrazolium, 137
Staling in membrane filter cultures, 624
Stilbamidine, effect of, on metabolism of *Blastomyces dermatitidis*, 639
Streptococcal cells, reclamation of, for reuse in adsorption of antisera, 239
— concentrates, agglutination by human sera of erythrocytes incubated with, 159
Streptococcus bacteriophage, role of calcium in proliferation of lactic, 508
Streptococcus pyogenes, effect of penicillin on, 347
Streptomyces coelicolor, metabolism of glucose by, 17
— *reticuli*, metabolism of glucose by, 17
— *scabies*, hexosemonophosphate shunt in, 17
— —, metabolism of glucose by, 17
Streptomycin, action of, 74
—, resistance of *Haemophilus pertussis* to, 140
—, — — *Micrococcus pyogenes* var. *aureus* to, 140
Streptomycin-resistant *Escherichia coli*, pantothenate-synthesizing enzyme in, 49
Sucrose, utilization of, by *Pseudomonas putrefaciens*, 120
Sulfhydryl groups, appearance of, during growth of *Bacillus globigii*, 101
Sulfonamide, resistance to, and *p*-aminobenzoic acid requirement, 238
Synergism, studies on antibiotic, 150

Tannic acid, inactivation of influenza virus by, 572, 576
Taxonomy of *Pseudomonas oxalaticus*, 505
Terramycin, resistance of *Haemophilus pertussis* to, 140

Thallium acetate, selective action of, for pleuropneumonialike organisms, 646
Thermoactinomyces, characterization of the genus, 377
— *monosporus*, characteristics of, 377
— *thalpophilus*, characteristics of, 377
— *vulgaris*, characteristics of, 377
Thiamin, relationship of, to pyridoxine in growth of *Saccharomyces cerevisiae*, 197, 204
Thiazolidone antibiotic, an antimetabolite to biotin, 118
Toxicity of diphtherial filtrates, tyrosine and, 244
Toxigenicity of *Corynebacterium diphtheriae*, role of bacteriophage in, 184
Transamidation during growth of *Saccharomyces cerevisiae*, 192
Transaminase in *Saccharomyces cerevisiae*, effect of thiamin and pyridoxine on, 204
Tricarboxylic acid cycle, component enzymes of, in *Pseudomonas fluorescens*, 517
— — — in morphogenesis in *Blastocladiella emersonii*, 712
Triphenyltetrazolium chloride, inhibition of microbial growth by, 240
—, staining of *Bacillus megaterium* with, 137
Tubercle bacilli, infrequent appearance of drug resistant strains of, 229
Tumor-inducing ability of crown-gall bacteria, transmittance of, 220
Typhus rickettsiae, influence of diphosphopyridine nucleotide on stability of, 671
Tyrosine, toxicity of diphtherial filtrates and, 244

Ultrafiltration of neurotropic viruses, 173
Ultraviolet inactivated *Escherichia coli*, reactivation of, by pyruvate, 455
Urea, utilization of, by *Alcaligenes faecalis*, 465

Vibrio costicolus, salt desideratum of, 526
Viruses, ultrafiltration of neurotropic, 173

Yeast, conversion of slow adapting populations of, 492
— strains resistant to arsenate and azide, 52
Yeasts, desoxyribonucleic acid and budding cycle in, 642
